

Because of the paradoxical experiences I have through, many changes taken place.

I will explain the dark-face and the other-faces about my activities because I myself very amazed (in the wrong sense) by some crazy stages around what I do. It's definitely a jungle.

Also, happily, (and it's the most important) i have launched this project including many facets-all-linked and at this stage, it's time to write from those two sides.

The bad interacts and the nice interacts can help other in many ways because I was faced behaviors extremely far of mine and I was without anything to protect me, my family, my activities : just me and my mind to find what to do without no means,no help,no home, no one single personal stuff like clothes shoes material or place to work: just me alone on earth.

I have learned how master all to eat to face the bad to master 1 day by 1 day since November 2018 (and it's again the case) how to manage a schedule in these conditions to learn to work and i got many many blows: myself in jail + family deprivation + bad status + jealousy + copycat + spoofing

My first goal when I created this **space** was providing clues about pointed areas and develop my steps so my capacities in live without **Antitrust** filters. My bad

The very first post January 2018 was about Sublimation.

I was in the best condition to provide now very sharp informations about: What about pain and sublimation.

I have already written on it in my blog many years ago, it is now more mastered to explain.

finally what I wanted to describe precisely was the Catharsis.

It was not really a wish but why not take that as skills?

The steps putting me at the most down level : to be precise, at a point that I am again without a single ID.

So to resume : all things titled infringement to the person 1 + to intellectual property 2.

To be honest: I was really confused but very focused.

I was forced to perform at the highest level like a Astronaut. Geez!

It's written as it's real. So. What goes out?

I am going to use now my bible of data, reach a better follow-up, I will highlight the steps 1 by 1+ all the connections behind, by, so : dedicated spaces in progress.

I will explain my disappointment from some unprofessional and misplaced-in-their-areas-people, imagining having rights to do things and imagining that stay undiscovered!

Seriously ? I don't clearly intend to let it continue so, to stalk, pretend to have accomplished thing by its own : it's about defending against unbalanced people and I don't want to cause them to be reduced but to block them to reduce me and it will go through the required steps including formal steps by order to let it be understood clearly.

In my case I was able to bounce back from the spoofing (which is way beyond the hack) but someone very close to me is still under the pressure of a long series of attacks on her creativity and she is sick. So I think this is very important and that a smart sequel will have to take place! It was not me who disturbed some people, struck by lack of creativity or of knowing what studies to do! since in 2021 the university is free in tons of sectors with the key: certificates of ability.

While I have been digital-nomad for many years, I find myself the target of crazy people! Only out of contempt and jealousy or by interest to block me in order to hide big errors made in my process by some backyard structures, administrations.

I am not looking for regrets and I will do my research without letting myself be

stuck to the wall. No one is forced to get down by malice in any forms, it is a problem of education or poor development and we must react.

It's something about my spaces in process right now.

It's in place only partially: now on **semantics** steps. I will updates.

1 2 3

Screenshot about such a perfect mixed-up! Paused to links on my own Astro-video project. youtu.be/4e-Qfa_6dpo
