The audience, the knowledges.

What does free knowledge?

In the field of Science, the original author uses so-called academic codes and methods: hypothesis, theorization, demonstration, conclusion, bibliography, etc. to present a work or other scientific data or concepts, while the extensionist has more freedom to put scientific content and discoveries within reach of a non-specialist audience.

Part of my [participation](#) for Wikimedia and [electricliterature contest](#)

Many thanks again [wikipedia](#) to giving me the words to write about In dream.

In dream depth, passionate, hard workings dedicated to Arts, Sciences and knowledges.

In dream Magazine: which is the last current living part of my plan because all my activity was completely deprived of means.

I'am therefore extremely grateful for this contest which will give me the opportunity to write about it using the resource of the status of author.

I didn't imagine how precious it was, even though I knew very well the value of reading and writing, I couldn't have considered the point about the action of my deepest and untouchable recourse to creation.

Female form.

The French Academy stresses, however, that "the only French feminine in Europe (prioress, superior, etc.) are those who come from Latin comparisons in -or", and cite "author" among the neologisms to be "avoided absolutely"

On the other hand, the High Council for Equality between Women and Men recommends women in **auteure** or **autrice** :Author female version in French.

Ive try the **index** for the March research and extend in April to create the magazine issues 10 plus 11 but it's in re-construct.

It will be diversified and containing a beautiful series of images of the transit of the Moon.

Index (can change)

Issue 10:

. Photographic techniques (A start in writings about technics I choose since part of my blog last year)

. Volcom

. Fields of study in Computer Science

. The World Wide Web

. NASA's

+ Solar Dynamics Observatory Catches Lunar Freeze Frame

+ Observe the Moon file

+ Transit (astronomy)

. The equinox

Issue 11:

. In the field of Science

The original author

. Computer graphics extract

. Vintage technology

. Science fiction universes

. Space opera

Due the actual re-conception of my plan , I ve moved during a short time in a free website with publicities.

Update:

Semantic encoding is a specific type of encoding in which the meaning of something (a word, phrase, picture, event, whatever)

is encoded as opposed to the sound or vision of it.

Research suggests that we have better memory for things we associate meaning to and store using semantic encoding.
