Updates in stars.

I will test few techniques.

All the pretty stars shine by the spring Sun ..

It will be time to test what i can get.

Next plans: Coupling as I have write, as all the pieces are here now.

Actually tries approach x8 and a vintage fisheye that i super can't wait for dedicated steps + deep sky pieces =)

+ a new element added to my 800mm.

A series of test will be made to see what it gets out of the lunar phases, knowing that it will depend on its position in relation to my current photography point but it will be cool to get all the time.
