## Data Art.

Test: Sun easily findable, now? **+1**

These **images** are enlarged pixels after manipulations to capture light in a smallest form and using it to create a video data on the photometry (two images: two different dimensions)

[fr.wikipedia.org/wiki/Photom%C3%A9trie](https://fr.wikipedia.org/wiki/Photom%C3%A9trie)

[fr.wikipedia.org/wiki/Photom%C3%A9trie\\_\(astronomie\)](https://fr.wikipedia.org/wiki/Photom%C3%A9trie_(astronomie))

They are in the magazine 34 + 35

The result is always magical.

The stages are in progress:

As re-upload of videos that had been destroyed via Tumblr ->

visible [there](#)

(The start) + [1](#)

Pdf N° 63 (2018)

Pdf N°3 (2019) + ...

Pdf N° 15(2020) + ...

By Tree (Data structure) Tab

+ From the [Video Art](#) section for an example

I haven't based on that.

I'm only using a pixel tool that I adjust to whatever size I want.
