

Someone yesterday hacked all my webspaces and it was attempted to connect to my patreon to delete all inside: all my webspaces was entirely erased including all my scientific work, samples, videos , writings for 3 years.

I am very very very down.

So currently I am in touch with someone in the USA for fix all that.

All my works was erased like scientific research, scientific data, writings, access all my spaces even Patreon.
It's just crazy.

The guy in charge is a specialist and apparently all can be recovered but, geez! it's really scary.

Yesterday I was making all the night my exam to Ensta Paris Tech and it was hard ..Really.

I was late and bla .. and I lost 5 hours because of the hacker when suddenly I was informed by e-mails but even that like in just few minutes, all was erased.

Disgusting. i am going to feel very confused and certainly i must be feeling frustrated for a time.
