

## Mind

Learning and understanding mistakes.

Three months of moon-mapping: I got results that really allowed me to locate!!

.. it's crazy since I thought I had already done it, but no! :)

So, with a few differences, yes! I was able to do it !!!!!

These are therefore real+good locations of precious craters available in the workshop and the way to get there.

This implies that there have been some changes in my photos like position, slightly improved data, therefore, for everything I was able to use during the observation training. (ditto for my artworks)
