

Update. 8

In dream drop to more depth if you don't know, I written more about the current mag which is a special edition with specially designed pages.

A mixture of a raised sky and a black page where the writing is reversed into black and white.

To go further in the textual form, the mag got chewing-analogies.

As there are only paper versions, this is not without reason and the dedicated subject: •Occult• expresses its aspects.

This is a vision of In dream even if it is not possible to really know without having:)
