Baby mag January +feb. update 3. MOON PHASES. Educational + mystical + + + stickers

This is the [third year](#) of my steps on patreon.

This space was launched on January 28, 2018, so I just got to launch a new phase of my Old-school-Astrovideography-plan =)

A first stickers serie of moon phases for the Observe the moon nights was created for reports as educational use (or for everything-else)

Created to develop ongoing educational projects (Astronomy for development)
More about it coming soon.

The goal is to take many samples on many times, and write on.

The project includes making sheets of stickers (not just MOON PHASES, but a bunch of possible topics like in the 90s mags hey hey;) attached to the mags, so it's in progress.
