Magazine update Special 3 years <3

The magazine has become more special for flying over an upside-down so, to discover the gem beyond, I set-up a BFF pledge.

A pledge who starts to baby mag N38+39 :)

To automatically receipt a bi-monthly magazine-issue.

Next magazines plus future updates, all that is happening are accessible by the link, below.

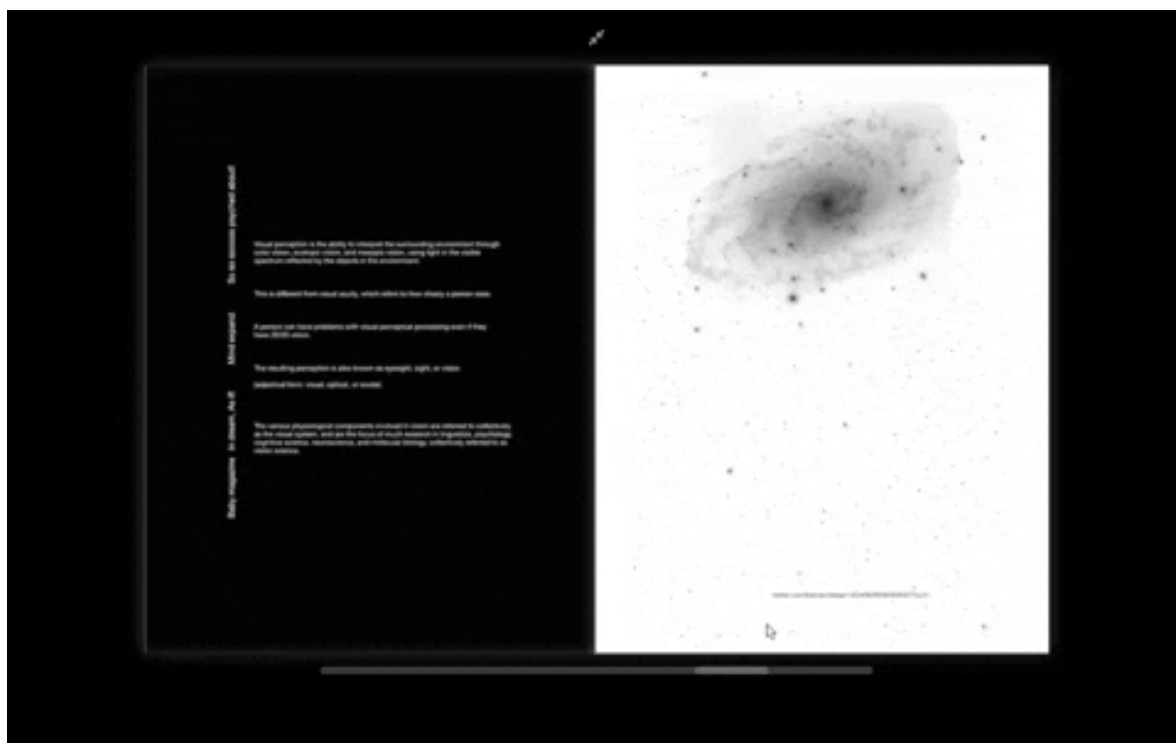

No more written there but this version will be only available here.

In this space are all very first steps, one by one from January 2018 so that's super cool.

Better Off Alone (Signum RMX)
Alexa Iles

Previous [magazines](#)

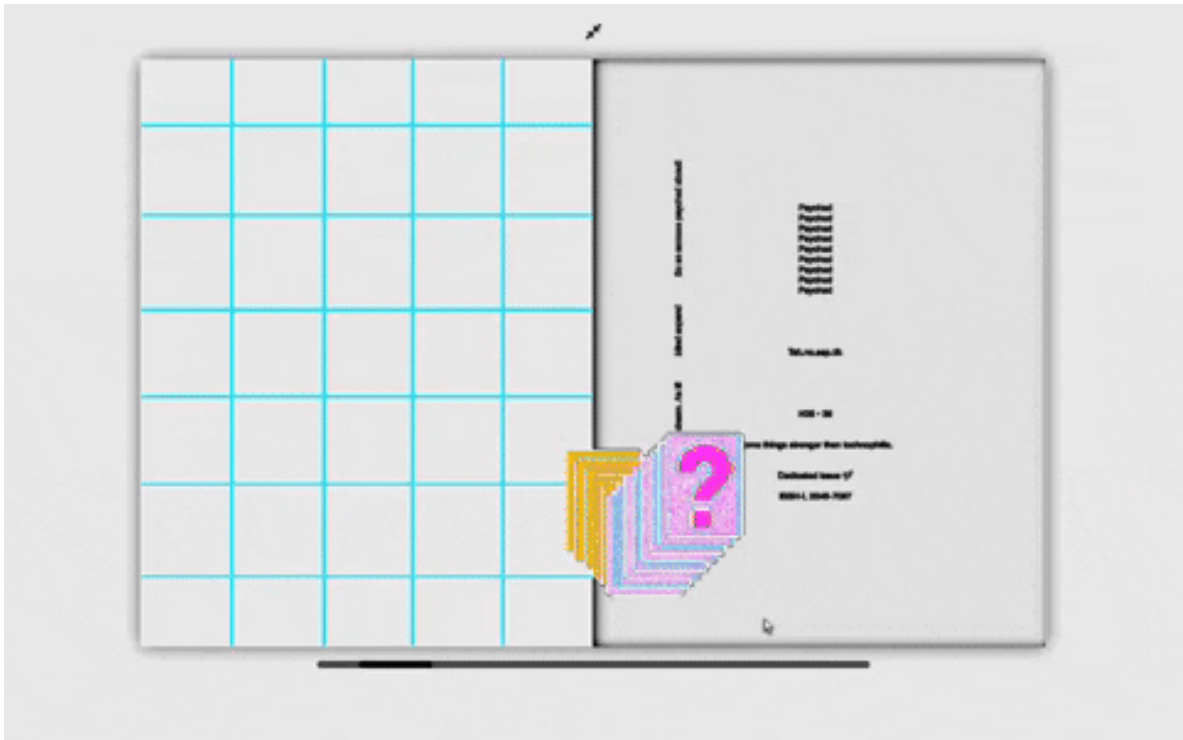

Magazine Workshop.

Science demonstration with the printed magazine.

It was a plan months earlier after I wrote about doping in photography.

First brilliant doping experience.

When this magazine will be printed, it will be the subject of this super special workshop: in version 2, I write on how to perform a chemistry experiment based on 30% of the magazine component using the mag itself to show.

The lite version will also receive the data + 1

+ **PRINT THIS POST** WORDS: 408 **NOTES: 1 8/12/21 — 12:24pm**

I wish to go one day in **1999** again

The perception calls on both the physiological senses and cognitive capacities, at an elementary or conscious level.
